

DESTINY QUEBEC

ARCTIC CLIMATE CHANGE YOUTH FORUM

FORUM JEUNESSE SUR LES CHANGEMENTS CLIMATIQUES EN ARCTIQUE

January 30, 2012

Dear students and colleagues,

It is with great pleasure that we invite you to join us at Lower Canada College in Montreal on April 23, 2012 as we host the fourth Canadian Youth Forum on Climate Change in the Arctic in collaboration with the University of Manitoba, McGill University, the Centre for Earth Observation Science, ArcticNet Inc. and Schools on Board.

Each year the students of Lower Canada College organize Destiny Quebec, a conference focused on issues of concern to today's youth. Its primary goal is to give students the opportunity to learn from and interact with experts in a variety of fields, as well as to engage in meaningful dialogue with their peers. This year Lower Canada College has been given the unique opportunity to host a conference on one of the most crucial issues of our time. The foremost scientists, environmentalists and political thinkers on climate change in the Arctic will be gathered in Montreal in April to help raise our awareness of the full magnitude of what is happening in our polar regions, and the environmental, cultural and political implications of these changes for our future.

Working in collaboration with Mr. George, the National Championships Chair, we want to extend a special invitation to national championships debaters. Seeing as the senior prepared topic deals with arctic issues, we will waive the conference fee for national debaters that register through Mr. George. Please inform him promptly of your desire to attend the conference and spots will be set aside. Once our registration materials are ready, they will then be sent directly to you.

We hope you will make plans to join us at this exciting event.

Sincerely,

Patrick Peotto

Assistant Head – Advancement

Staff Advisor to DQ Committee
